## **DETAILED ACTION**

### ***Election/Restriction Vacated***

1. Applicant's response to the Restriction Requirement mailed 2/20/09 is acknowledged (paper filed 3/13/09). The Restriction Requirement mailed 2/20/09 is vacated because the cited reference to Novo et al. was published after the filing date of the instant application. A new Restriction Requirement is presented herein. Examiner apologizes for any inconvenience this may cause Applicant. Currently claims 1-23 are pending and under consideration.

### ***Election/Restrictions***

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

To have a general inventive concept under PCT rule 13.1, the inventions need to be linked by a special technical feature. The special technical feature that appears to link claims 1-23 is the utility of biomarkers like sCD40L and CRP in acute cardiovascular diseases. However, the reference of Garlachs et al. (Heart, Vol.86, 2001, pages 649-655) disclosed this special technical feature. Garlachs et al. disclose that CD40L/CD154 is elevated in inflammatory acute coronary syndrome. For example see abstract. Various other markers, such as CRP and troponin were also measured. See Table 1 on page 650. . Therefore the technical feature recited in claims 1-23 is not a contribution over the prior art. Accordingly the groups set forth below are not so linked as to form a single general concept under PCT Rule 13.1.

Art Unit: 1641

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- A. Group I, claim(s) 1-17 and 22 are drawn to a method of analyzing a biological sample in connection with acute cardiovascular disease; classified in class 435, subclass 7.21, for example. (A 1<sup>st</sup> first method employing a special technical feature).
  - B. Group II, claim(s) 18-19 are drawn to kits comprising reagents for analyzing cardiovascular diseases; classified in class 422, subclass 61, for example. (A 1<sup>st</sup> product comprising a special technical feature).
  - C. Group III, claim(s) 20-21 and 23 are drawn to therapeutic methods monitoring acute cardiovascular diseases; classified in class 424, subclass 9.1, for example. (A 2<sup>nd</sup> method employing the special technical feature).
3. The inventions listed as Groups A through C do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Under PCT rules Applicant is entitled to an examination of one of the combination groupings: (1) a product, a method of using said product and a method of producing said product. The instant claims are directed to multiple methods and product utilizing a special technical feature that is not a contribution over the prior art. Accordingly, Applicant must select one for further prosecution.

4. Because these inventions are distinct for the reasons given above, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group A through C are not totally inclusive, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).
